Hearing device technology that's

making waves

oticon
PEOPLE FIRST

Hearing technology powerful enough to get you back into life

Hearing loss slowly separates you from the people and activities you love. The reason is simple: fewer sounds reach your brain, and you have to work harder to follow conversation. But now thanks to a technological breakthrough, you may be closer to a more natural way of hearing than ever before.

The new Oticon Opn S™ unleashes the full potential of the part of your brain that receives and processes audio information. With Oticon BrainHearing™ technology in Opn S, you can experience hearing in a more natural way than ever before. So you can focus on what matters most to you.

Enjoy speech understanding on par with normal hearing

Oticon's newest hearing aid breaks the limits of what has previously been possible with hearing aids. Oticon Opn S is proven to give you even better speech understanding with less effort in noisy environments than our previous generation of hearing aids. So now, you can thrive and take an active part in difficult listening situations, just like people with normal hearing*.

For people with typical hearing loss and well-fitted hearing aids, in noisy situations

Open up your world to
the people around you

Traditional hearing aids coped with noise by restricting sounds and focusing on a single source of sound at a time. For example, you could hear the person who is straight in front of you while other room sounds are suppressed.

That was effective to a point. But it resulted in a completely unnatural way to experience your environment. Background sounds add richness and texture. When they are suppressed, your brain finds it difficult to follow the conversation and you can become tired.

Now, the technology in Oticon Opn S unlocks all the wonderful sounds in your environment and lets you experience them in a more natural, comfortable manner.

Oticon Opn S gives your brain access to the relevant sounds around you, putting you in charge of which sounds you want to focus on - and not your hearing aid.

You'll be able to understand what's spoken better, with less effort and strain, and be able to better remember what people say to you:**

BrainHearing™ technology

Connect to the things that matter most

Listen to music wirelessly, make
hands-free phone calls, and more

You don't hear with your ears, you hear with your brain. That is why you need hearing aids that are fast enough to keep up with the brain. BrainHearing™ technology in Oticon Opn S scans the environment 100 times per second. This gives you constant access to 360° sounds to support the way your brain naturally makes sense of sound.

Oticon Opn S gives you proven BrainHearing benefits*:

- **Reduces your listening effort**
- **Helps you remember more of what is being said**
- **Gives you better speech understanding**
- **Improves your ability to follow conversations with multiple speakers**

ConnectClip

A discreet microphone accessory that connects wirelessly to Oticon Opn S.

Hands-free phone calls for any smartphone

With ConnectClip, it's easy to make hands-free calls with iPhone®, Android™ or any other modern smartphone.

Music in high-quality stereo sound

Your hearing aids become high-quality, wireless headphones, so you can stream music directly from iPhone, iPad®, or iPod touch®. For any other modern smartphone or Bluetooth®-enabled device, you stream using the wireless ConnectClip.

Stream sound directly from your TV

You get sound from your TV directly into your hearing devices, using the Oticon TV Adapter.

A full day's charge with a boost of sound clarity

Rechargeable technology that lasts your whole day

The optional Oticon Opn S miniRITE R rechargeable solution ensures that you don't need to worry about power any more. Ask your hearing care professional if the miniRITE R is the right device for you.

Here are the main benefits you will experience with rechargeable Opn S devices:

- Three-hour charging time for a full day of power, including streaming*
- Quick recharge - 30 minutes for an additional six hours of power
- Freedom from disposable batteries with state-of-the-art lithium-ion battery technology

Boost your hearing devices with Oticon ON App

The Oticon ON App lets you discreetly control your hearing devices with the tap of a finger.

Boost your hearing when you need it most

Use the new booster function in the Oticon ON App to give your devices an extra boost in situations where you need more help making speech stand out from noise.

Hearing keeps you fit

HearingFitness™ is a new feature in the Oticon ON App. It is designed so you can take greater control of your hearing habits.

* Lithium-ion battery performance varies depending on hearing loss, lifestyle and streaming behavior.
