Turn Your Priorities into Reality

Do you wish to hear and understand with confidence even in tough hearing environments? We at Audina do our best to satisfy your wishes and deliver even more than you expect.

Suite is Audina's most sophisticated hearing aid family featuring the Audio Efficiency™ core technology. No matter which environment you are in, Audio Efficiency™ technology orchestrates the right set of features and accessories for you.

Speech

Audio Efficiency™ provides premium sound quality and speech understanding in demanding listening environments.

Comfort

Audio Efficiency™ incorporates an advanced set of features to create a comfortable and less tiring hearing experience.

Individualization

Audio Efficiency™ offers various listening programs and connectivity accessories supporting your individual lifestyle.

Turn Challenging Situations into Personal Triumphs

Suite Pico RITE is such a small but powerful device. With state-of-the-art technology, it has the potential to make a big difference to your life.

Would you benefit from technology that helps you understand conversations more easily?

ChannelFree™ signal processing technology enhances speech understanding while providing optimal comfort in listening situations.

Would you benefit from a tiny device that helps you locate important sounds such as speech in busy places? With a set of different directionality features, Suite Pico RITE supports 360° sound detection.

Would you benefit from a hearing aid that helps you specifically in noisy environments? Various noise reduction features will detect the noise sources and cleverly reduce them so you can feel less disturbed and more relaxed again.

Would you benefit from having your hearing aids connected to your mobile phone and other sound sources? Suite Pico RITE can wirelessly connect to multiple devices via Audina's SoundGate. Sound from your music player, mobile phone, or an inductive loop system (in theaters, places of worship, etc.) can be streamed directly to your hearing aid. The slim-line RC-N remote control or the SoundGate App can also be an ideal companion to your hearing aids.

Turn Challenging Situations into Success Stories

For even greater success in challenging listening situations, Audina offers various connectivity accessories.

SoundGate 3 gives you the freedom to listen with your hearing aids to a number of wired and wireless audio sources. It is designed to be discreet, comfortable to handle, and easy to use.

SoundGate Mic is a small microphone that can be worn by the person you are speaking with. Coupled with the SoundGate 3, the speech signal is transferred directly to your hearing aids.

The **RC-N** remote control makes changing volume or program settings easy, particularly if you find it difficult to do on the hearing aid itself.

Read our SoundGate brochure to learn more about the different options for being connected with Audina devices. You can also ask your hearing care professional or visit the Audina website for further information.
